Sort your LifeQI out PART II

Good Afternoon Tower Hamlets,

My turn to write the comms this week and It's going to be about the team's favourite subject at the moment: Life QI!

A question for you today – or to add on your QI meeting agenda for next week: *Are your current project scores up to date ? Is your project LifeQI profile up to date ?*

If you need support, please get in touch. I will be also able to pull a report for your practice and update your project score if needed.

Here's below the **list of all the projects with a progress score equal or above 3.5** sitting currently on the LifeQI platform (if you don't have a login yet, **here's the link**).

— Well done Albion, Barkantine, Blithehale, Crisp Street, City Wellbeing, Gough Walk, Harford, Island Health, Jubilee Street, Limehouse, Merchant and Stroudley Walk. Now it's time to share the learnings! —

We need to make sure that your projects are clearly write up on LifeQI to enable sharing and learning J ! We are also looking for volunteers to share more about their project in next week's comms – please **get in touch with Virginia, dropping her an email (virginia.patania@nhs.net)** so she can showcase your success story and help you inspire others! Your short spiel, backed up by numbers and hopefully one or two images, would need to land in her inbox *by Tuesday lunchtime*.

Have a lovely sunny weekend all,

Best wishes,

Clemence
