

Help us rename the programme, and we'll help you shop

Competition carries on!!!

Find a new name for your programme

—

Many of you have told us that “workstream 1” or “Resilience programme” do not really describe what we’re all about. We are looking for a new name for the programme this is your chance to win a **£50 voucher!!!!**

Send your suggestions to

thccg.get.your.mojo.back@nhs.net

Before the 15th of June

We will then launch a survey with the most popular names, and the winner will receive a snazzy voucher!

Programme update

We now have trained 4 cohorts of Pocket QI Training (introduction to quality improvement) and ISIA Day 1 and 2. If you want to learn more about the methodology and tools here is the link to the AMAZING QI ELFT Microsite. Full of Videos, 1page handouts. Follow this link >> <https://qi.elft.nhs.uk/resources/>

You should have met your QI Coach already, they have completed staff interviews in practices and some QI coaching sessions.

End of May and June are dedicated to data wall sessions (see below “Insight on your data wall session to find more”).

GP SUMMIT

About 300 members of general practice met on the hottest day in April to discuss how to work together, as providers and commissioners. We met to tackle some of those issues closest to primary care, and think of collective solutions... Lots of these are right up our Quality Improvement alley: moving to flat leadership structures, creating borough-wide locum banks, creatively tackling DNAs, standardising remote registration processes... The list goes on. The group continues to meet, and we hope these solutions will feel as live in your practices as they did in our busy, noisy room!

Governance—Practice Steering

We are setting up a practice led steering group to help shape our primary care quality improvement programme. We are in the process of recruiting people who are actually going through the programme to give us feedback and come up with ideas of how to improve the programme. Please let us know if you are interested. We will keep you updated on the outcomes!

Meet the coaches

In order to provide support, one coach is supporting the QI Team in your practice with QI coaching session 1hour a week or 2 hours every two weeks.

Dominic Roberts

GP in Hackney, enjoying the teamwork in caring for a socially deprived and cosmopolitan area with all its challenges.

Favorite quote: *“Instead of wondering where your next vacation is, maybe you ought to set up a life you don't need to escape from.”*

Chido Ikeyinia

Improvement consultant and Trainer by background.

Life motto *“The key to winning is beginning. So what are you waiting for? Let' get started!”*

Insight on your data wall session !

Alex Trew, the data analyst for this programme is building one data wall for each practice. This information is only to be used for the programme. Sources are very diverse: Emis, Edenbridge, HR and financial data, F&F, staff survey...

Your data wall will be introduced during your data wall session helping you and your colleagues to draw an assessment of your organisation. The data wall is structured on the 5 P's framework, a tested analytical method that focuses on Purpose, Patients, Professionals, Processes and Patterns.

The main 4 objectives of this data wall are:

- Having a comprehensive and systematic assessment of your organisation
- Describing a deeper knowledge of your system's against the 5 Ps
- Engaging all members of your organisation (clinical and non clinical) in the process of assessment and awareness building
- Identifying strengths and opportunities for improvement based on the 5 P's assessment

This data wall should not be static and will be yours. It is meant to be updated, enriched, rectified...

If you don't know when your data wall session is or you haven't been invited please contact your practice manager . EVERYONE WELCOME.

If you want to find more about the 5 P's follow this link >>>
